SIMON DESIGN ENGINEERING LLC

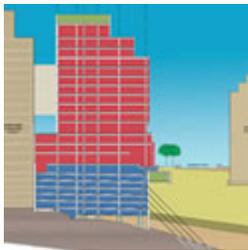

DANA-FARBER CANCER INSTITUTE YAWKEY CENTER FOR CANCER CARE • BOSTON, MA

LASTING RELATIONSHIPS: *How do You Keep Your Friends Close?*

We read about it, see it, and talk about it: Today's market isn't what it was. We are told that we need new strategies, new clients, and new ways to reduce costs. One thing that is not new are your relationships with your existing clients. Those clients that have kept coming back and have always valued your opinion, they are still calling. You must have gotten something right, so build on it.

For over twenty years, Simon Design has developed a mutual confidence with Dana-Farber on their Boston Campuses providing consulting structural engineering services. A lot can change in a couple of decades, but Simon Design and Dana-Farber have managed to grow in unison. The relationship began with small renovations and quickly evolved into larger, new construction with the award winning Smith Building in 1996.

Today, the 22-story Yawkey Center for Cancer Care is Dana-Farber's addition to the existing Smith Building which is being built on a 198-ft-by-185-ft site and includes seven below-grade parking levels. The \$350-million Yawkey Center also abuts the local energy supplier, Medical Area Total Energy Plant (MATEP), Jimmy Fund Way, and Brookline Avenue. As a result, a 3-ft thick slurry wall, held in place with nearly 300 permanent tieback anchors, was built to cut-off groundwater and isolate the building from ground vibrations. The foundations, built 10-ft inside the slurry walls, bear directly on bedrock and are also isolated from the surrounding soils. [>> MORE](#)

Simon Design provides exceptional consulting services for a range of clientele on various new projects, renovations, and studies. By putting the client first, providing first-rate consulting services, and operating with respect and care, Simon Design continues to establish relationships built on integrity, trust, and honesty. Simon Design has always been and always will be here for their clients.

Simon Design provides Dana-Farber with the following services: Structural Engineer of Record, Conceptual Project Design, Project Programming & Studies, Value Engineering and Management, Project Coordination, Material Evaluation Services, Quality Assurance, Shop Drawing Review, Construction Administration, Project Closeout, and Parking Consulting.

Informational Tidbit: Did you know Simon Design has been working on a prototypical design for mid-range wind farms? [>> MORE](#)
